

**PRODUCT UPDATE – February 2010 (update 31.08.2011)**

**Nozzles and spares for  
Electronic Injectors EUI/EUP/HEUI  
Suitable for Delphi®, CAT® and Navistar® systems**

The **Electronic Unit Injector (EUI)** system was developed by Delphi® in the 1990s, for use in large diesel engines, to meet the challenge posed by increasingly stringent emissions legislation. The **Electronic Unit Pump (EUP)** system is essentially the same technology as EUI but designed specifically for engines with camshafts situated within the cylinder block. The **Hydraulic Electronic Unit Injector (HEUI)** is an electronically controlled unit injector hydraulically actuated.

These systems are very popular on CAT®, John Deere® and Volvo® vehicles.

Check out our new parts for Electronic Unit Injectors.

**EUI/EUP NOZZLES (suitable for DELPHI®)**
